

Krantz Filter Systems and Dampers at 2nd. International Conference on Nuclear Decommissioning in Aachen (Germany)

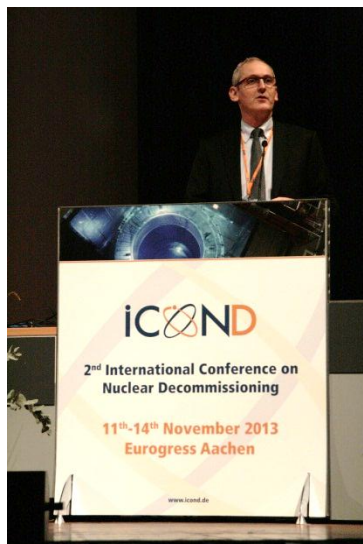

Aachen Institute for Nuclear Training (AiNT) organized the 2nd. International Conference on Nuclear Decommissioning from November 12th – 14th, 2013. Approx. 300 designers, operators, general contractors, service contractors, inspectors and scientists met in Aachen to discuss the actual state of the art, valid regulations and the procedures and operations during decommissioning of nuclear facilities. Beside the three-day conference program also an exhibition was arranged.

In the conference program Claus Schweinheim, Division Manager of Krantz Filter Systems and Dampers, presented “Ventilation Systems for Decommissioning Respectively the Safe Inclusion of Nuclear Facilities” and explained the problems using external exhaust systems as well as possible solutions in detail. The participants attended the presentation with special interest and took part in the lively discussion afterwards.

At the exhibition booth of Krantz Filter Systems and Dampers the visitors got information regarding online re-cleanable filter systems and other components for HVAC systems during decommissioning of nuclear facilities. Many new and interesting contacts were made and existing business relations were updated.
